## EXPERIENCE

<b>Systems Engineer</b> Infosys Ltd.	Nov 2021 – Dec 2023 <i>Hyderabad, India</i>
---	--

- Collaborated with developers to triage and resolve React component issues and API mismatches in staging, improving deployment stability.
- Automated backend validation tasks via custom scripts, reducing manual effort by 30%.
- Debugged SQL production issues, decreasing downtime by ~15%.
- Streamlined JIRA workflows for change requests, cutting approval delays by 2 weeks per initiative.

<b>Freelance &amp; Independent Projects</b> <i>Remote / Self-driven</i>	Dec 2023 – Present
--	--------------------

- Delivered full-stack applications (React/Next.js + Express + MongoDB) deployed on AWS (S3, Lambda), Vercel, and Render, ensuring scalable, production-ready deployments.
- Designed REST APIs, implemented JWT authentication, and configured end-to-end pipelines for maintainable applications.
- Strengthened C++ DSA (LeetCode, Codeforces) and completed MongoDB fundamentals and AWS Cloud basics.
- Explored Hugging Face pipelines and prototyped AI-integrated features for practical use-cases.
